

## Ultimate Eurovision Winners

1. Using the table below and **map one**, produce a density shaded map to show the countries that have won the Eurovision song contest.

Your key should be **density shaded**, using **one** colour.

Table showing the number of times countries have won the Eurovision Song Contest.

Number of times won/country	7	6	5	4	3	2	1
	Ireland		France	Netherlands		Spain	Austria
			United Kingdom	Sweden		Switzerland	Monaco
			Luxemburg			Italy	Germany
						Norway	Belgium
						Denmark	Yugoslavia (Now defunct)
							Estonia
							Latvia
							Turkey
							Ukraine
							Greece
							Finland
							Serbia
				Russia			

2. Paste map one into your book, add a **title** and **date**. Write a brief description of the **distribution** shown by your map.

**Has there been a shift in the spatial distribution of Eurovision winners over time?**

- Using **map two** and the table below, shade the maps to show the winning countries for each decade. Use the same colour for each decade map.

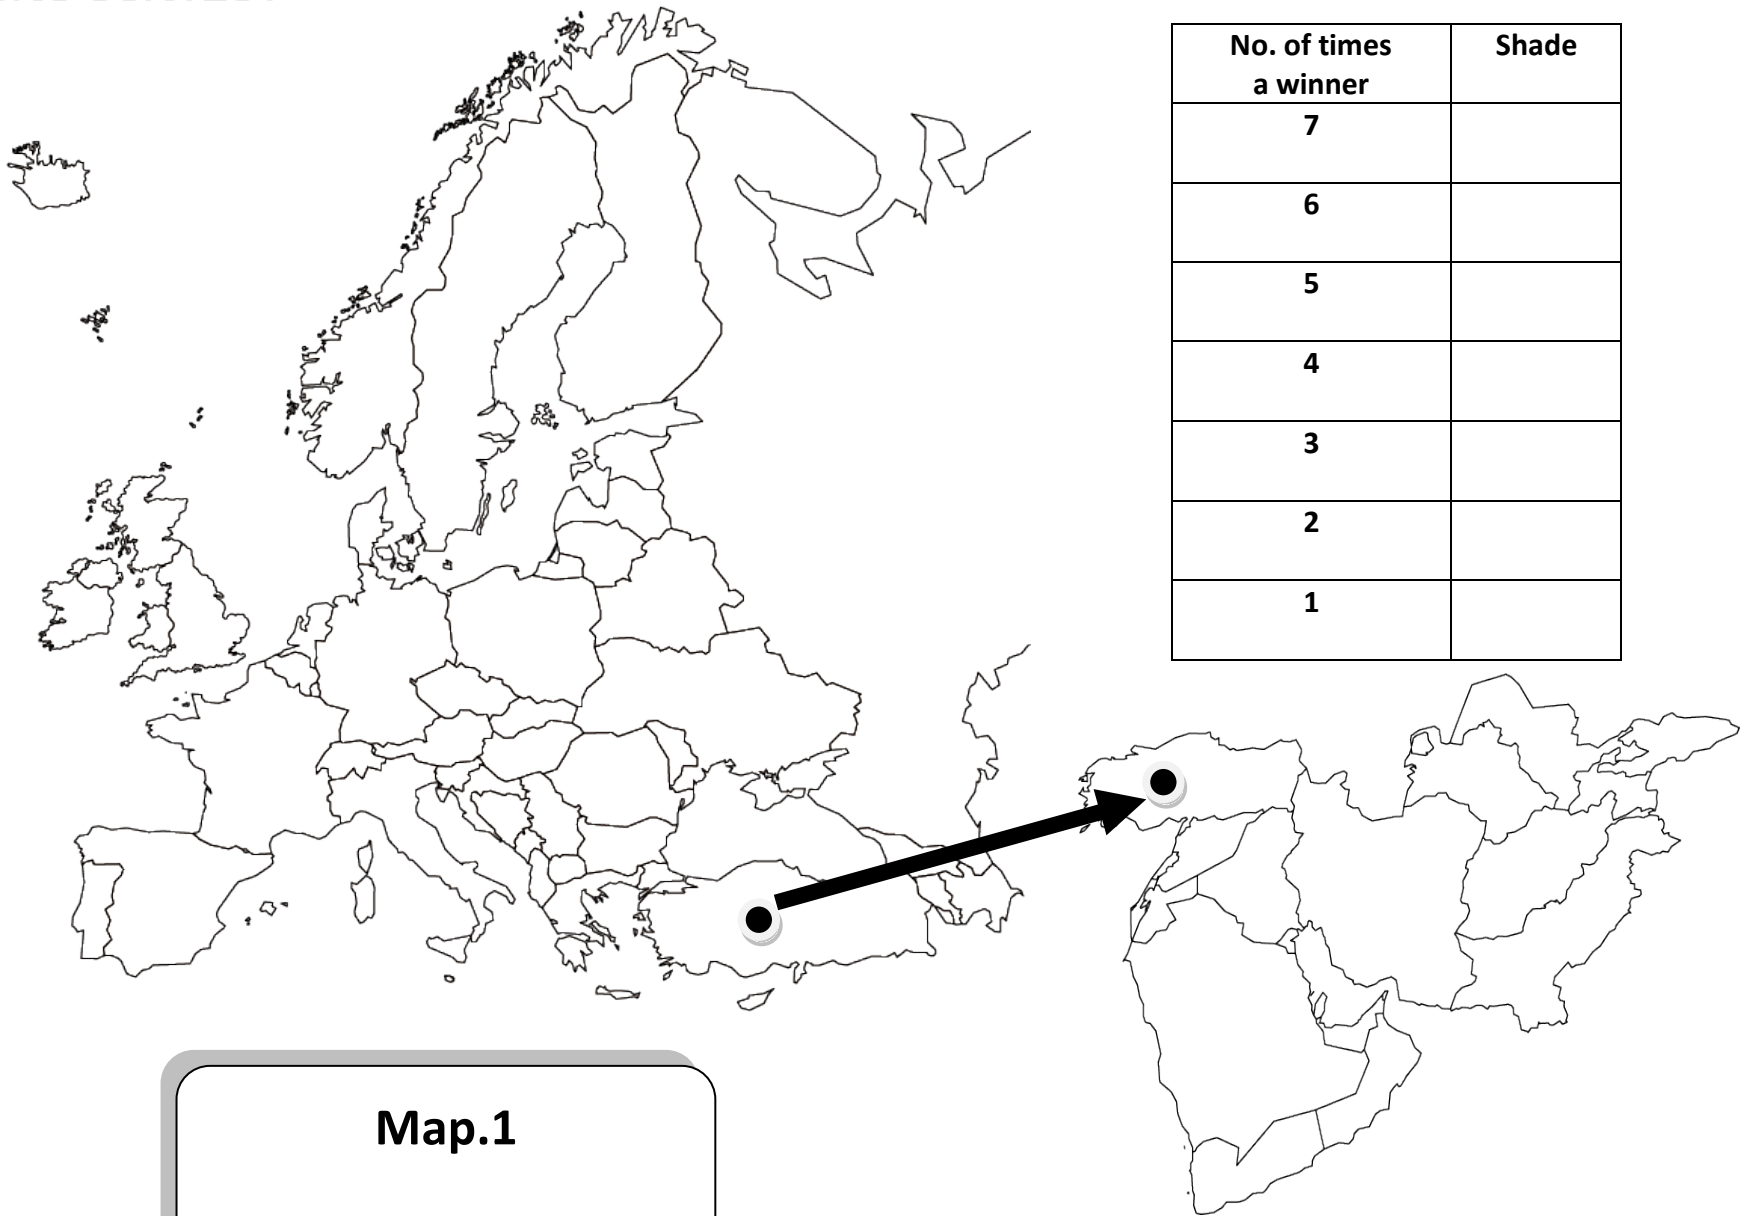

**Table showing the winning countries over the last four decades.**

Decade/Winner	1970s	1980s	1990s	2000s
	Ireland	Ireland	Italy	Estonia
	Monaco	United Kingdom	Sweden	Latvia
	Luxemburg (x2)	Germany	Ireland (x4)	Turkey
	Sweden	Luxemburg	Norway	Ukraine
	Netherlands	Sweden	United Kingdom	Greece
	United Kingdom	Norway	Israel	Finland
	France	Belgium	Sweden	Serbia
	Israel (x2)	Ireland		Russia
		Switzerland		
		Yugoslavia (Now defunct)		

- Paste map **two** into your book, provide a **title**.
- Commentators have suggested that the voting system is flawed in the contest, as neighbouring countries vote for each other. As a result, this has meant that increasingly Eastern European countries have won the contest. (Why?)

Considering your map, how true is this? Has there been a geographical shift in the winners of the contest over the last four decades?
